## The Andrews Companies Announces Launch of Records Consulting Company

**Cleveland, Ohio – May 1, 2005...**The Andrews Companies today announced the addition of Andrews Consulting Services to its family of businesses that provide expertise and support to the records and information management (RIM) industry. The newly launched company will assist clients across various business and industry sectors in the review, development and management of sound RIM programs.

"It has truly never been more important for the business community to take notice of how they manage their information assets," says ACS President Lee Miller. "Not only can companies save as much as 40% by properly managing their records and information, they'll be more compliant with today's regulations – not to mention the time and money saved. We are uniquely qualified to assist our clients with their RIM programs, not only because of our talented and knowledgeable consultants, but because many of our team has owned or operated a records storage and management facility and appreciate the implications faced by a company whose records are poorly managed."

With its extensive list of consulting services, ACS also provides clients with access to information management software, provided by its sister company, Andrews Software, Inc. This web-based RIM software allows companies to track the activity of every hardcopy record, either in-house or offsite, accurately and securely.

For more information about ACS, please visit [www.acsrim.com](http://www.acsrim.com) or call 800-807-2093 (US and Canada) or 440-546-9771 outside the US and Canada.

###

**About The Andrews Companies**

The Andrews Companies includes Andrews Software, Inc. (ASI), the records and information management industry's most experienced provider of software solutions and Andrews Consulting Services (ACS), providing a spectrum of RIM consulting services to business and industry.

ASI offers a family of industry-tailored, proven software solutions for offsite information management companies around the globe. Originally written in 1984, the ASI suite of products combines a depth of industry knowledge with innovative technology to effectively address the business and IT requirements of its clients.

ACS combines considerable records and information management expertise with proven tactics to reveal hidden risks, streamline processes and establish order to RIM programs. With its scope of services, ACS assists its clients by improving information access and security, ensuring legal and regulatory compliance and establishing cost savings and avoidances.
