## Jim Miller Joins The Andrews Companies as Account Representative

**Cleveland, Ohio – December 15, 2005...**The Andrews Companies, comprised of Andrews Software and Andrews Consulting Services providing records and information management solutions for business and industry, is pleased to announce the addition of Jim Miller as Account Representative.

In this position, Jim will be responsible for developing new business and providing service to existing customers. With nearly 10 years of experience in Internet technology and software sales, Jim is well-versed in supporting clients and providing assistance to determine records and information management requirements and best solutions.

“As we have grown this past year, the Andrews Companies have maintained our superior level of service and support for our customers,” says President Lee Miller. “Jim brings considerable expertise to The Andrews Companies that I am confident will compliment our current initiatives and service levels. And while we say we are like family at The Andrews Companies, with Jim on board, this statement could not be more appropriate!”

Jim can be reached at [jmiller@andrewssoftware.com](mailto:jmiller@andrewssoftware.com) or by calling 1-800-807-2093.

### **About The Andrews Companies**

The Andrews Companies includes Andrews Software, Inc. (ASI), the records and information management industry's most experienced provider of software solutions and Andrews Consulting Services (ACS), providing a spectrum of RIM consulting services to business and industry.

ASI offers a family of industry-tailored, proven software solutions for offsite information management companies around the globe. Originally written in 1984, the ASI suite of products combines a depth of industry knowledge with innovative technology to effectively address the business and IT requirements of its clients.

ACS combines considerable records and information management expertise with proven tactics to reveal hidden risks, streamline processes and establish order to RIM programs. With its scope of services, ACS assists its clients by improving information access and security, ensuring legal and regulatory compliance and establishing cost savings and avoidances.
